

TNC Workshop Objectives

- How Florida oyster reefs have changed and why;**
- What are the continuing threats to oyster reef health;**
- Where oyster reefs and restoration activities are located;**
- Human use patterns;**
- The value added to Florida's ecosystem by restoring reefs; and**
- Where the best places are to focus additional effort on oyster reef restoration, including what are the criteria we should use to decide this.**

My Personal Objectives

Get everyone introduced and talking

**Establish a mechanism to keep people talking
(and learning)**

Identify areas of need and opportunity

**Provide information and guidance on
conducting ecologically based restoration**

Housekeeping

- Restrooms are on opposite side of elevators
- No food or drink in auditorium
- Break room and vending machines on 4th floor behind elevators
- You will need a new parking tag for the second day
- Speakers-I need to load your presentations
