

Lassing Park

Oyster Reef and Seagrass
mitigation project for Homeland
Security

- Concrete rubble deployed in December 2002
- Rubble was from the boat ramp at the Coast Guard base
- Concrete was not broken into small enough pieces
- Design was altered by JJ Sosa

- Concrete rubble 1 year after installation
- Sand buildup west side
- Constant pounding from winds and wave action
- No oyster colonization

- Crustaceans starting to become heavily colonized on the east side
- Less colonization on the west side
- Beginning of noticeable oyster colonization

- Breakwater continues to grow further to the east
- Sand is accumulating on the east side
- Seagrasses are growing at a faster rate
